

# The Work of the Truth Beauty and Goodness Commission

It is difficult for the human mind to grasp such large concepts and systems that can't even be seen, so we have designed some simple diagrams and explanations that may help illustrate, in human terms, some aspects of these new circuits and the work involved.

# The New Supreme Adjutant Circuits

While the original (and now repaired) 7 Adjutant Mind Spirits Circuit will continue to serve the mortal life of this planet (non-adjusted man through all 7 circuits, and higher animals through the first 5 circuits), those with Thought Adjusters will access a new system of mind circuits which we have labelled the **Supreme Adjutant Mind Spirits Circuit**. These new circuits were installed several years before this writing, as part of the repair process of the damaged original Adjutant Mind Spirits Circuit. These new circuits acted as a temporary bypass and replacement for the original circuits while they were shut down for repair and testing.

During that shutdown period many strange things happened on the planet due to the disruption. Many have noticed it, people acting strangely and in inexplicable ways never seen before, even higher animals sometimes acted strangely. These were symptoms of the planet wide shutdown of these damaged circuits, and the effects will take some years before they gradually fade away. Every effort was made by all involved to minimize the disruptions, but remember that we are talking about shutting down a planetary scale system that supports nearly 8 billion people and countless higher animals, and switching all these living beings over to a temporary system, and at the end of the repairs, switching the repaired circuits back on and returning billions of people and animals back to them. There were bound to be some glitches and unexpected occurrences, and most of us have witnessed or felt some of them. The good news is that no serious or permanent problems occurred when viewed from a planet wide perspective.

Keep in mind that when the original Adjutant Mind Spirit Circuits were first installed on this planet long ago, there were very few humans to connect to them. This allowed everything about the system to evolve seamlessly and very slowly as the population of mankind slowly increased in numbers, intellect and mind capacity, with gradual and subtle adjustments being made along the way over many millennia of time.

What we are describing on this page is an entirely different situation, where the system must immediately handle a vast civilisation of many billions of living creatures of every level of intellect and mind capacity. This required that a significant amount of testing be done by mortal test subjects before putting the system into service. This allowed for the discovery and resolution of many problems before they could spread across the planet, some of which could have been disastrous.

Moving forward, the new Supreme Adjutant Mind Spirits Circuit will provide an enhanced foundation for the Direct Ascension School and its advanced curriculum.

# The Truth Beauty and Goodness Commission Testing Protocol

Below is the process diagram of the testing loop that was used by the **Truth Beauty and Goodness Commission** during most of the 2023 winter (northern hemisphere) to get the new Supreme circuits conditioned and ready to receive billions of Urantian minds.

supreme-adjutant-circuits-testing-cycle.png

**[1]** The Human Evaluator was only partially aware of the special spirit interaction happening between Nebadonia and Master Architect 11 on Salvington. The Human Evaluator's awareness of these interactions was on a need to know basis.

**[2]** The Human Evaluator was fully aware of the connection with Master Architect 11.

**[3]** The Human Tester and the Human Evaluator interacted with each other the way humans normally do while sitting next to each other and talking. The Human Tester was also aware of special testing signals coming through the Supreme Adjutant Mind Spirit circuits and originating from Nebadonia. The Human Tester would send direct feedback to Nebadonia through their connection. The Human Evaluator would receive direct human feedback from the Human Tester, and then transmit this feedback directly to Master Architect 11 through their connection **[2]**.

This created a complete testing feedback loop where Master Architect 11 provided new settings to be tested directly by Nebadonia **[1]**, Nebadonia sent new Supreme Adjutant Mind Spirit circuit test signals to the Human Tester. The Human Tester then provided feedback to both Nebadonia (via direct mind connection) and to the Human Evaluator (as human interpretation) **[3]**. The Human Evaluator then passed human interpretations to Master Architect 11 **[2]**.
