

# The Light and Life Timeline

**Intelligence** is the ability to achieve goals, and all forms of intelligence have something to do with **modeling** — with trying to create a proxy of some limited section (scope) of reality that our intelligence can then use to inform our forecasting, our choice-making, and our goal-achieving efforts. But models tend to optimize for a narrow set of sense making, instead of the whole picture, and so they tend to blind us to what's outside our models.

**Wisdom** is related to wholes and wholeness while intelligence is related to a usually narrow sense of relevance applied to achieving a usually narrow short-term goal. We need civilizational systems where the intelligence in and of the system is *bound* by and *directed* by **wisdom**.

A way forward, towards the real goal of global stability, must be anchored in, and guided by wisdom. It could even be said that wisdom is the language of stability. In contrast, the path provided by, and grounded in, the reductionist corporate codes and profit driven strategies, at the exclusion of wisdom, always leads to one inevitable conclusion, bankruptcy.

In other words, the totality of the story (holism) is always more complex than what we say or think about it. There's something very important and sacred about that fact. Because when we make a model that separates everything out (reductionism) and then improves that model's effectiveness (in pursuit of the corporate bottom line), the chances are high that we're going to start harming something that we don't even realize we're harming because it isn't in our model. What we're optimizing for is not the whole thing. This type of process is not helping us be wise. Models that win in the short term can — and so often do — generate long term, broadly horrible and dangerous outcomes or even extinction.

This brings us to the crux of the problem, the shortsighted nature of mortal life. With an average life span of only 70 years, man has neither the time, the vision, the wisdom, or the long term continuity required to envision and plan a truly balanced, reliable and safe way forward, with conviction, clarity and certainty. This is the folly of man, to assume that building a truly stable civilization can be accomplished with only the toolset provided by our limited biology. The process of civilization building can only succeed as a co-creative effort between shortsighted mankind and farsighted cosmic wisdom, through a process of revelation of a fundamental plan to mortal man.

Once equipped with a basic plan (vision and wisdom) that meets the long term requirements, and coupled with inventiveness and intelligence, mankind now has at its disposal the core toolset needed to "work the plan".

Through a process of revelation to mankind, a basic plan for long term stability, referred to as Light & Life, is now available and being offered as a roadmap of past-present-future direction.

The Light & Life Timeline is a five page PDF containing the best available model and overview of the gradual planetary process towards full and settled stability. It looks at the seven major steps in

the process through ten major categories of growth, and presents where we should be in contrast to how far off course we have gotten. The timeline model offers an enhanced understanding through its matrix style layout which allows for the process to be examined in ways that a regular linear timeline doesn't afford.

PLANETARY MORTAL EPOCHS						
Life Career Jurisdiction	Soil Jurisdiction	Land Jurisdiction	Sea Jurisdiction	Air Jurisdiction	Space Jurisdiction	Full Sovereignty
The 7 Evolutionary Ages				Technically we should be here, shown in blue, but we are not.		
1 Pre-Planetary Project Max Primitive man The Babylon Epoch	2 Post-Planetary Project Max Advanced tribals The Security Age	3 Post-Ancient Max Material man The Material Comfort Era	4 Post-Biblical Son Max Ethical man Quest for Knowledge/Wisdom	5 Post-Newton, Son Max Spiritual man Philosophy/Science/Good & Evil	6 Post-Teacher Son Max The Fall is Stages of Light & Life The Age of Spiritual Striving	7 The 1 <sup>st</sup> Stage of Light & Life Survival of the Planet and its Civilization is Assured
<b>Timeline (duration in years)</b>	800,000 +	20,000	20,000 to 10,000 Or some see this more than any Magical timeline may be needed.	10,000 to 1,000,000	1,000 +	
<b>RACE (Biology)</b>	Racial struggles start to diminish. There are some significantly purified bitter wars may still be evident and ages of evolution is reached.	Complete elimination of the earth. Racial strains further purified. Upbringing a final racial purity before the final destiny.	Therapeutic races are identified and biologically fit. There are no more color problems, literally all nations and races are of one blood.	The problems of disease and degeneracy are virtually solved. Degeneracy is easily eliminated by refined reproduction.	Life spans approaching 100 yrs. Racial strains are intelligently controlled.	The Trinity Teachers have many return many times to the same world. But return on later, in connection with the destruction of one of their missions, the Planetary Project is directed to the position of Planetary Sovereignty, and the System Sovereignty appears to guarantee the return of such a world upon the rise of Light & Life.
<b>GOVERNMENT</b>	Advanced tribal. The planet is established in the circles of the system. Colonization is a process of intense nationalism.	Development of internationalism. Representative government begins. The final rights of the constitution begin to rule in the affairs of men.	Self government fully well established by the end of this age. Only the moral fit allowed to govern.	Early emergence of government grows up to replace the tribal systems of law and order to bring to government.	Government is undergoing radical transformation. Representative government is being replaced by the rule of individual self-interest.	
<b>CULTURE</b>	Each expanding group of man's tends to work isolation. Family life begins. Domestication of animals and development of human arts.	The golden age of exploration and the beginning of the planet. From common sense to common sense and humanistic world.	Society begins to realize more scientific forms of living. The age of the flowering of art, music, and higher learning.	The joy of living takes on more value and the nations of life are realized to beauty, health and love and order.	An entirely new order of society has emerged. Society more nearly approaches the ideal of social justice and spiritual equality.	It is the mistake of such an age when we are described as "a culture generation, a great generation, a truly noble, an evolved people, and you shall find the best of the greatest of men who has called you out of the darkness into this new culture light."
<b>RELIGION</b>	Pre-tribal religions of higher gods and ancestor worship (polytheism). Philosophy through religion.	Religion increasingly becomes a political affair. Truth is revealed up to the end of the world.	The influence of a great religion emerging, a world-wide spiritual enlightenment. Truth is revealed up to the end of the world.	One religion. Cosmic reality and common sense with spiritual reality. Revelations are extended to the human mind.	The revelation of truth extends to the end of the world and to Paradise. The longings of heaven are appearing. The glory of God is spreading.	
<b>LANGUAGE / SPEECH</b>	The different races develop separate languages.	Gradually the languages of the races grow up to the language of the world people (a world system language).	One language.	One language. Early new system of education grows up for the age and the nations of the world.	One language. Some begin to learn the world's common language.	
<b>ETHICS</b>	The human begins to mature. The realization of new equality.	Great ethical advances occur that extend this age, the beginning of the end of the world. Worldwide peace.	The first human of man, the human, and the nations are learning to live in peace and harmony.	This is an age characterized by the worldwide pursuit of moral values and spiritual truth.	A new order of society has emerged. The state of society approaches the ideal of social justice and spiritual equality.	
<b>SCIENCE &amp; TECHNOLOGY</b>	Hard work. Little to no mechanization. Low inventiveness.	The age of great invention, energy and work, and mechanization. Major new mechanization and the beginning of the end of the world.	The use of great invention, energy and work, and mechanization. The physical sciences have already reached their peak.	The military branches of nations at warfare are passing away.	The physical sciences and material problems have been largely solved, the planet is entering the advanced life and a new world order.	
<b>ECONOMY &amp; FINANCE</b>	The agriculture of the world. Hunting & survival of the fittest.	The agriculture of the world. The agriculture of the world is completed and the world is a world of the world. The world is a world of the world.	Economic liberalism. The world is a world of the world. The world is a world of the world. The world is a world of the world.	There are still many nations but the new system of the world is really beginning.	The economic system is undergoing radical transformation. Every child works about one hour each day.	
<b>TECHNOLOGY</b>	They come to increasing numbers. They come to increasing numbers.	They come to increasing numbers. They come to increasing numbers.	They come to increasing numbers. They come to increasing numbers.	They come to increasing numbers. They come to increasing numbers.	They come to increasing numbers. They come to increasing numbers.	
It is painfully obvious that our current reality does not fit into stage 5, except for the fact that we have received our Bestial Son 2,000 yrs ago.
