

The Light and Life Timeline

Intelligence is the ability to achieve goals, and all forms of intelligence have something to do with **modeling** — with trying to create a proxy of some limited section (scope) of reality that our intelligence can then use to inform our forecasting, our choice-making, and our goal-achieving efforts. But models tend to optimize for a narrow set of sense making, instead of the whole picture, and so they tend to blind us to what's outside our models.

Wisdom is related to wholes and wholeness while intelligence is related to a usually narrow sense of relevance applied to achieving a usually narrow short-term goal. We need civilizational systems where the intelligence in and of the system is *bound* by and *directed* by **wisdom**.

A way forward, towards the real goal of global stability, must be anchored in, and guided by wisdom. It could even be said that wisdom is the language of stability. In contrast, the path provided by, and grounded in, the reductionist corporate codes and profit driven strategies, at the exclusion of wisdom, always leads to one inevitable conclusion, bankruptcy.

In other words, the totality of the story (holism) is always more complex than what we say or think about it. There's something very important and sacred about that fact. Because when we make a model that separates everything out (reductionism) and then improves that model's effectiveness (in pursuit of the corporate bottom line), the chances are high that we're going to start harming something that we don't even realize we're harming because it isn't in our model. What we're optimizing for is not the whole thing. This type of process is not helping us be wise. Models that win in the short term can — and so often do — generate long term, broadly horrible and dangerous outcomes or even extinction.

This brings us to the crux of the problem, the shortsighted nature of mortal life. With an average life span of only 70 years, man has neither the time, the vision, the wisdom, or the long term continuity required to envision and plan a truly balanced, reliable and safe way forward, with conviction, clarity and certainty. This is the folly of man, to assume that building a truly stable civilization can be accomplished with only the toolset provided by our limited biology. The process of civilization building can only succeed as a co-creative effort between shortsighted mankind and farsighted cosmic wisdom, through a process of revelation of a fundamental plan to mortal man.

Once equipped with a basic plan (vision and wisdom) that meets the long term requirements, and coupled with inventiveness and intelligence, mankind now has at its disposal the core toolset needed to "work the plan".

Through a process of revelation to mankind, a basic plan for long term stability, referred to as Light & Life, is now available and being offered as a roadmap of past-present-future direction.

The Light & Life Timeline is a five page PDF containing the best available model and overview of the gradual planetary process towards full and settled stability. It looks at the seven major steps in

the process through ten major categories of growth, and presents where we should be in contrast to how far off course we have gotten. The timeline model offers an enhanced understanding through its matrix style layout which allows for the process to be examined in ways that a regular linear timeline doesn't afford.

PLANETARY MORTAL EPOCHS						
LIFE CARRIER JURISDICTION	SOIL JURISDICTION	LAND JURISDICTION	SEA JURISDICTION	AIR JURISDICTION	SPACE JURISDICTION	FULL SOVEREIGNTY
The 7 Evolutionary Ages				Technically we should be here, shown in blue, but we are not.		
1 Pre-Planetary Project Max Primitive man The Babylon Epoch	2 Post-Planetary Project Max Advanced tribals The Security Age	3 Post-Ancient Max Material man The Material Comfort Era	4 Post-Biblical Son Max Ethical man Quest for Knowledge/Wisdom	5 Post-Bestial Son Max Spiritual man Philosophy/Science/Food & Space	6 Post-Teacher Son Max The Fall is Stages of Light & Life The Age of Spiritual Striving	7 The 1 st Stage of Light & Life Survival of the Planet and its Civilization is Assured
TIMELINE (duration in years)	800,000 +	20,000	20,000 to 10,000 Or some see this more than one Magical timeline may be needed.	10,000 to 1,000,000	1,000 +	
RACE (BIOLOGY) <small>Full racial diversity Some races still exist about</small>	Racial struggles start to diminish. The races are significantly purified. Some races may still be in wild and stages of evolution is reached.	Complete elimination of the wild. Racial strains further purified. Upgrading a final racial capacity. Extreme racial blending.	Therapeutic races are identified and biologically fit. There are no more or color problems, literally all nations and races are of one blood.	The problems of disease and disfigurement are virtually solved. Degeneracy is easily eliminated by refined reproduction.	Life spans approaching 100 yrs. Racial strains are intelligently controlled.	The Trinity Teachers have many return many times to the same world. But return on later, in connection with the destruction of one of their missions, the Planetary Project is directed to the position of Planetary Sovereignty, and the System Sovereignty appears to guarantee the return of such a world upon the rise of Light & Life.
GOVERNMENT <small>Tri-tribal</small>	Advanced tribal. The tribes are established in the circles of the system. Culture is in a period of intense nationalism.	Development of internationalism. Representative government begins. The Basic Rights of the constitution begins to rule the affairs of men.	Self government fully well established by the end of this age. Only the moral fit allowed to govern.	Extremely representative of government grows up to replace the tribal signatures of former times leading to self government.	Government is undergoing radical transformation. Representative government is being replaced by the rule of individual self control.	
CULTURE <small>Careless to care for residents, often careless for</small>	Each expanding group of man's tribes to work together. Family life begins. Domestication of animals and development of human arts.	The golden age of exploration and the beginning of the planet. From savagery to a new world. Education becomes a necessity.	Society begins to realize its more spiritual nature of being. The age of the flowering of art, music, and higher learning.	The joy of being takes on more a value and the nations of life are realized to beauty heights of love and kindness.	An entirely new order of society has arisen. Society more nearly approaches the ideal of social justice based on spiritual equality.	It is the mistake of such an age when we are described as "a culture generation, a great generation, a holy nation, an enlightened people, and you shall give birth to the greatest of men who has called you out of the darkness into this new culture light."
RELIGION <small>Religion of fear and repression</small>	Pre-tribal religions of higher gods and ancient religions (polytheism). Philosophy through religion.	Religion increasingly becomes a political affair. Truth is revealed up to the end of materialism of the constitution.	The influence of a great religion arising, a world-wide spiritual enlightenment. Truth is revealed up to the end of materialism.	One religion. Cosmic reality and communion with spiritual reality. Revelations are extended to the human nature.	The revelation of truth extends to the end of materialism and to Paradise. The longings of heaven are appearing. The glory of God is spreading.	The planet is changed as of the primary revelation of the spiritual nature. Revelation is the spiritual nature.
LANGUAGE / SPEECH <small>Simple evolutionary language</small>	The different races develop separate languages.	Gradually the languages of the races grow up to the language of the whole people (a universal language).	One language.	One language. Entirely new systems of education grow up for all and the nations are of one blood.	One language. Science begins to learn the laws of the natural language.	
ETHICS <small>Ethics of the people Ethics of the personal bonds.</small>	The human begins to mature. The realization of new equality.	Great ethical actions occur that are the first step, the beginning of the new world. The end of materialism.	The first bond of man to himself, and the nations are learning to love peace and to equality.	This is an age characterized by the worldwide pursuit of moral values and spiritual truth.	A new order of society has arisen. The state of society approaches the ideal of social justice based on spiritual equality.	
SCIENCE & TECHNOLOGY <small>Learn to make fire and basic tools.</small>	Hand tools. Little to no mechanization. Low inventiveness.	The age of great invention, energy use, and mechanization. Major mechanical and the beginning of the new world.	The use of great invention, energy use, and mechanization. The physical sciences are already reaching their peak.	The military branches of nations at warfare are passing away.	The physical sciences and material problems have been largely solved, the planet is opening to the advanced life and a new world is arising.	
ECONOMY & FINANCE <small>Barter & survival of the fittest.</small>	The struggle of age begins.	The struggle of age is completed and the nation and individual age begins.	Economic liberation. The struggle against the world is over. Still necessary for the world to be the same as the world.	There are still many nations but the new of the natural language is really arising.	The economic system is undergoing radical transformation. Every child works about one hour each day.	
TECHNOLOGY <small>Receptive to temporary technology. First human progress.</small>	They come to increasing numbers.	They come to increasing numbers. Capable for the future. Future development of spiritual progress.	Being this epoch the majority of the world's people are in the state of the world.	At present we are still in the state of the world.	This is the age when many nations are being born, among the living.	
It is painfully obvious that our current reality does not fit into stage 5, except for the fact that we have received our Bestial Son 2,000 yrs ago.
