

# The Light and Life Timeline

**Intelligence** is the ability to achieve goals, and all forms of intelligence have something to do with **modeling** — with trying to create a proxy of some limited section (scope) of reality that our intelligence can then use to inform our forecasting, our choice-making, and our goal-achieving efforts. But models tend to optimize for a narrow set of sense making, instead of the whole picture, and so they tend to blind us to what's outside our models.

**Wisdom** is related to wholes and wholeness while intelligence is related to a usually narrow sense of relevance applied to achieving a usually narrow short-term goal. We need civilizational systems where the intelligence in and of the system is *bound* by and *directed* by **wisdom**.

A way forward, towards the real goal of global stability, must be anchored in, and guided by wisdom. It could even be said that wisdom is the language of stability. In contrast, the path provided by, and grounded in, the reductionist corporate codes and profit driven strategies, at the exclusion of wisdom, always leads to one inevitable conclusion, bankruptcy.

In other words, the totality of the story (holism) is always more complex than what we say or think about it. There's something very important and sacred about that fact. Because when we make a model that separates everything out (reductionism) and then improves that model's effectiveness (in pursuit of the corporate bottom line), the chances are high that we're going to start harming something that we don't even realize we're harming because it isn't in our model. What we're optimizing for is not the whole thing. This type of process is not helping us be wise. Models that win in the short term can — and so often do — generate long term, broadly horrible and dangerous outcomes or even extinction.

This brings us to the crux of the problem, the shortsighted nature of mortal life. With an average life span of only 70 years, man has neither the time, the vision, the wisdom, or the long term continuity required to envision and plan a truly balanced, reliable and safe way forward, with conviction, clarity and certainty. This is the folly of man, to assume that building a truly stable civilization can be accomplished with only the toolset provided by our limited biology. The process of civilization building can only succeed as a co-creative effort between shortsighted mankind and farsighted cosmic wisdom, through a process of revelation of a fundamental plan to mortal man.

Once equipped with a basic plan (vision and wisdom) that meets the long term requirements, and coupled with inventiveness and intelligence, mankind now has at its disposal the core toolset needed to "work the plan".

Through a process of revelation to mankind, a basic plan for long term stability, referred to as Light & Life, is now available and being offered as a roadmap of past-present-future direction.

The Light & Life Timeline is a five page PDF containing the best available model and overview of the gradual planetary process towards full and settled stability. It looks at the seven major steps in

the process through ten major categories of growth, and presents where we should be in contrast to how far off course we have gotten. The timeline model offers an enhanced understanding through its matrix style layout which allows for the process to be examined in ways that a regular linear timeline doesn't afford.

PLANETARY MORTAL EPOCHS						
Life Career Jurisdiction	Soil Jurisdiction	Land Jurisdiction	Sea Jurisdiction	Air Jurisdiction	Space Jurisdiction	Full Sovereignty
The 7 Evolutionary Ages				Technically we should be here, shown in blue, but we are not.		
1 Pre-Planetary Project Max Primitive man The Babylon Epoch	2 Post-Planetary Project Max Advanced tribals The Security Age	3 Post-Ancient Max Material man The Material Comfort Era	4 Post-Biblical Son Max Ethical man Quest for Knowledge/Wisdom	5 Post-Newton, Son Max Spiritual man Philosophy/Science/Good & Evil	6 Post-Teacher Son Max The Fall is Stages of Light & Life The Age of Spiritual Striving	7 The 1 <sup>st</sup> Stage of Light & Life Survival of the Planet and its Civilization is Assured
<b>Timeline (duration in years)</b>	800,000 +	20,000	20,000 to 10,000 Or some see this more than any Magical timeline may be needed.	10,000 to 1,000,000	1,000 +	
<b>RACE (BIOLOGY)</b>	Racial struggles start to diminish. There are some significantly purified. Some races may still be in wild stages of evolution or reached.	Complete elimination of the earth. Racial strains further purified. Upgrading a final racial capacity. Extreme racial blending.	Therapeutic races are identified and biologically fit. There are no more or colour problems, literally all nations and races are of one blood.	The problems of disease and degeneracy are virtually solved. Degeneracy is easily eliminated by superior reproduction.	Life spans approaching 100 yrs. Superior nations are intelligently controlled.	The Trinity Teachers have many returns many times to the same world. But return on later, in connection with the demonstration of one of their missions, the Planetary Project is directed to the position of Planetary Sovereignty, and the System Sovereignty appears to guarantee the return of such a world upon the use of Light & Life.
<b>GOVERNMENT</b>	Advanced tribal. The planet is established in the circles of the system. Civilizations in a period of intense nationalism.	Development of internationalism. Representative government begins. The Most Rights of the constitution begins to rule in the affairs of men.	Self government fully well established by the end of this age. Only the moral fit allowed to govern.	Early emergence of government grows up to replace the tribal systems of law and order to be government.	Government is undergoing radical transformation. Representative government is being replaced by the rule of individual self control.	
<b>CULTURE</b>	Each expanding group of man's tends to work isolation. Family life begins. Domestication of animals and development of human arts.	The golden age of exploration and the final subduing of the planet. From savagery to a new world. Education becomes a universal.	Society begins to realize a more scientific form of living. The age of the flowering of art, music, and higher learning.	The joy of living takes on more value, and the nations of life are realized to be unity of light and love.	An entirely new order of society has arrived. Society more nearly approaches the ideal of social brotherhood and spiritual equality.	It is the mistake of such an age when we described as "a culture generation, a great generation, a holy nation, anointed people, and you shall give birth to the greatest of men who has called you out of the darkness into his marvellous light."
<b>RELIGION</b>	Pre-tribal religions of higher gods and ancestor religions (polytheism). Philosophy through legends.	Religion increasingly becomes a practical affair. Truth is revealed up to the all-mighty of the constitution.	The influence of a great religion appearing, a world-wide spiritual enlightenment. Truth is revealed up to the final heaven.	One religion. Cosmic reality and communion with spiritual reality. Revelations are extended to the human mind.	The revelation of truth extends to the central universe and to Paradise. The longings of heaven are appearing. The glory of God is spreading.	
<b>LANGUAGE / SPEECH</b>	The different races often develop separate languages.	Gradually the languages of the races grow up to the language of the united people (a universal language).	One language.	One language. Entirely new systems of education grow up for the age and the social system of the new times.	One language. Some begin to learn the Law of the new language.	The planet is changed as of the primary revealed order of mental activities. Source: "Gnostic Book" pages 12 & 13.
<b>ETHICS</b>	The human begins to mature. The realization of new equality.	Great ethical actions reveal themselves to the world, the goal of all society. World-wide peace.	The first heaven of man, the first heaven, and the nations are learning to live in peace and in unity.	This is an age characterized by the world-wide pursuit of moral culture and spiritual truth.	A new order of society has arrived. The state of society approaches the ideal of social brotherhood and spiritual equality.	
<b>SCIENCE &amp; TECHNOLOGY</b>	Hard work. Little to no mechanization. Low inventiveness.	The age of great invention, energy, and work. Machine and modernization and the spirit of modern times.	The power of spirit and materializing into the world development. The physical sciences have already reached their pinnacle.	The military branches of nations at war are passing away.	The physical sciences and material problems have been largely solved, the planet is opening to the advanced life and a new world order.	
<b>ECONOMY &amp; FINANCE</b>	The agriculture of the land. Hunting & survival of the fittest.	The agriculture of the land. The agriculture of the land is completed and the world and modern age begins.	Economic liberalism. The world is now required to be a world of independence. The physical sciences have already reached their pinnacle.	There are still many nations but the new order of the world is really arriving.	The economic system is undergoing radical transformation. Every child works about one hour each day.	
<b>TECHNOLOGY</b>	They come to increasing numbers.	They come to increasing numbers. Especially for the light of the world, the world of the world.	Being this epoch the majority of the world's people are in light or in dark. Still necessary for the world to be in light or in dark.	At present we will see the end of the world and the end of the world.	This is the dispensation where many nations are turned into one among the living.	

It is painfully obvious that our current reality does not fit into stage 5, except for the fact that we have received our Bestial Son 2,000 yrs ago.
