What is The Correcting Time?

The **Correcting Time** is a broad term used by celestial teachers and administrators for the current period of celestially-inspired transformations occurring throughout our planet. The Correcting Time is a much broader project than the Teaching Mission. The Teaching Mission is characterized by its explicit use of the Urantia revelation as a reference; the Correcting Time does not. The **Correcting Time** is a broad term used by celestial teachers and administrators for the current period of celestially-inspired transformations occurring throughout our planet. The Correcting Time is a much broader project than the Teaching Mission. The Teaching Mission is characterized by its explicit use of the Urantia revelation as a reference; the Correcting Time does not. The common element of the Correcting Time in all its features is a dramatic increase in celestial assistance for the purpose of fostering planetary growth in accordance with the universe principles of revelation (Light) and evolution (Life), in both secular and spiritual contexts. Technically speaking, the possibility for such celestial intervention had to await the reconnection of certain “spiritual circuits” made possible by the lifting of the quarantine that was placed on our planet because of its involvement in the Lucifer rebellion.

The largest degree of change regarding this **Correcting Time** is of the nature of the materially unseen. The greatest shift is in spiritual administration instituting procedures and efforts from the celestial vantage point. Most of what you have witnessed already will be the inspiration needed to carry you through in your quest to comprehend and to implant new ideas into the minds of those you touch. Great things are, indeed, happening, most of which you cannot see and you must, therefor, take on faith that it is so.

On the other hand you may witness some inspiring performances of spiritual reality and awakening but these are by design to be humanly initiated and co-creatively manifested. Celestial influence will be suspected but never provable by material means.

The Correcting Time is a divinely initiated period on our world, aimed at addressing the spiritual, social, and moral imbalances that have developed over millennia. This initiative is part of a broader effort to realign the planet and its inhabitants with the original divine plan, which was significantly disrupted by historical events such as the Lucifer Rebellion and the default of Adam and Eve. These unfortunate events threw the entire planet into a state of spiritual confusion and delayed its progress toward Light & Life, the ultimate evolutionary goal of planetary civilization where peace, harmony, and divine alignment prevail.

What is being corrected?

1. **Spiritual Confusion**
   One of the central issues being corrected is the loss of spiritual clarity and connection to the Divine. Due to the Lucifer Rebellion, which questioned the sovereignty of God and promoted a false sense of independence from the Creator, our world became disconnected from normal planetary administration. This led to widespread spiritual darkness, as many individuals and institutions lost sight of their divine purpose.

2. **Divine Governance**
   The Correcting Time is re-establishing the natural order of divine governance on Earth. Celestial personalities are working to help mortals understand their place in the universe and guide mankind back toward spiritual alignment.

3. **Morality and Ethics**
   Over the course of history, the lack of divine leadership led to moral and ethical decay. The Correcting Time seeks to restore the core moral principles that align with the will of the Creator — principles like truth, love, service, justice and compassion. This involves reawakening mankind to the values of brotherhood, equity, cooperation and unity.

4. **Society**
   The Correcting Time also involves addressing the systemic issues that prevent the flourishing of our advancing civilisation. The Correcting Time establishes foundational principles and guidance for building durable and stable societies. Societies that can thrive in harmony with divine purpose for the creation of a loving and peaceful global civilisation, where issues like social, economic, and political injustices become a thing of the past.

5. **Evolution of Consciousness**
   A key goal of the Correcting Time is to elevate mankind's consciousness to recognize higher spiritual truths, to develop and recognize greater wisdom, and to expand our understanding of life in the universe. This period encourages individuals to grow spiritually, intellectually, and morally, by aligning their lives with divine principles.

The Correcting Time is a period of **renewal and healing**, where both individuals and society as a whole are being guided back into alignment with the original divine plan for our world. It is a time of great opportunity for personal and planetary transformation, and it invites all who are willing to participate in this planetary upliftment toward a brighter, more spiritually aligned future.
