Odium: Why are — We the people — hated so much?

A long list of well meaning pundits have offered dozens of possible reasons why the Global Crime Syndicate (aka the Cabal, the Deep State, The Swamp, the Globalists, the Elites etc.) might want to cause a massive depopulation event, as has been advertised on the Georgia Guide Stones and in numerous official print publications. The problem with these scenarios is always the same. These pundits get tangled up in the deception, the coded messages and the deceptive symbolism used by those who harbor this nefarious agenda.

Unfortunately, while these scenarios sound fascinating and are entertaining, they don't really get to the root of the matter to expose the deeply buried truth. This truth is a simple one. This truth has been around for hundreds of years as you will learn in more detail in the next Lighthouse File about the Rabbit Hole.

The truth is simple. It's all about the money, lots and lots of money. It's only about the money. It's always about the money. The Global Crime Syndicate values money above the lives of men, women and children. That is the beginning and the end of that truth. As you will learn in the next article, the global financial and monetary system that the Bankers and Elites are in charge of is now entirely bankrupt (starting in the year 1999).

Question: What causes bankruptcy?

Answer: Debt, lots and lots of debt.

Now we are arriving at the crux of the matter. Debt, all debt is a two sided thing. In order for a debt to be made, there must first exist a credit from which the debtor can draw. That is an absolute fact. There simply is no other way to create a debt. With that fact established, let's look at another fact. When a debtor has incurred so much debt from his creditor(s) that he/she/it can no longer manage to pay it off, what are the debtor's options at that point.

Option 1: Go into bankruptcy and obey the prescribed legal remedies.
Option 2: Act outside the law and take matters into your own hands.

There is a reason why I use the term Global **Crime** Syndicate. That's because the people who are part of it prefer to use Option 2. They consider resolving their problems through criminal acts as a viable option, and the most effective criminal act for getting rid of debt is murder. Kill your creditor(s) and you no longer have to pay back your debt to them, since there is no one left to pay. Killing your creditors may not be nice, but it is very effective.

That my friends is the plain and ugly truth behind this nefarious mass depopulation agenda which masquarades as various other things. These criminals want to avoid paying back their debts, and they are willing to do whatever it takes to make that happen. Now of course they don't want you and I to know this ugly truth, so they use various forms of camouflage to deceive us and keep us in the dark.

You might wonder "what kind of camouflage?" Consider the following short list:

- We need a drastic population reduction because of global warming.
- The pandemic will kill countless millions of people.
- Large scale Wars.

The problem with these scenarios is that they don't work on their own. They need you, me, everybody to buy into these imaginary scenarios. When millions and billions of people start believing in these doomsday type of scenarios, then they start having a life of their own. We the People are the ones who allow these ugly scenarios to come to life. Once we give them life, then the real puppet masters who are hiding in the shadows are quick to exploit them, all for the eventual outcome of killing off as many of their creditors as they possibly can, in order to avoid having to pay us back their massive debts.

Here is an excellent summary of the situation: A BRIEF REPORT For Those Trying to Understand the New World.
